Alfred Fuller Dies From Injuries in Mine Accident

On Thursday morning February 26, at about 11 o'clock, a serious accident occurred in the Black Diamond mine when Alfred Fuller was critically injured by a rock fall in the workings of the mine. It seems that Fuller was in the act of prying loose a large body of coal when a huge rock was loosened above and falling, crushed the man beneath it. Aid was summoned immediately and the rock was removed from the body of the injured man and he was taken from the mine. Dr. Elliott of Swallow was called and Winter Bros. Ambulance was summoned from Drumheller to take Fuller to the Drumheller hospital. He died at that institution at about 4:30 p.m. that afternoon without gaining consciousness.

An inquest was held at Drumheller on Friday afternoon and death was proclaimed accidental.

Funeral Services of the late Alfred Fuller were held on Sunday afternoon from the Carbon United Church, with the Rev. Wm. McNichol officiating.

The deceased leaves to mourn his loss a sorrowing wife and one daughter two years of age. Also his parents, who live in Carbon, five brothers and four sisters.

AIRPLANE AIDS CENSUS TAKERS

The Canadian census takers are now up in the air. On the boundary of Northern Alberta and the Northwest Territories a survey of the size of the Bison family in Wood Buffalo Park is being made by means of aerial photography. It would take years to cover the same territory on foot.

Wood Buffalo Park was created several years ago to take care of the surplus from a herd of 6000 buffalo in Wainwright Park, 125 miles east of Edmonton. The nucleus of the Wainwright herd was purchased by the Canadian Government from a rancher in Montana more than twenty-five years ago. The herd at that time numbered approximately 300 animals.

National advertisers will help all local advertising of an article, but local advertising must go hand in hand with marketing a new product when the product can be obtained in only a few towns of the Dominion.

PLAN TEST CARGOES THROUGH CHURCHILL

Shipping lanes between Canada and Europe by way of the much discussed Hudson Bay route will be tested next September, it was announced by Dr. R. J. Manion, Minister of Railways & Canals, following conferences between his department, representatives of the steamship lines and the Hudson Bay Railway. Two or three cargoes of grain about 75,000 bushels each, will be exported from Churchill, the Hudson Bay port, it being expected that the facilities at Churchill will be ready in September to take care of them.

DUST STORM HAS HURRICANE INTENT

What is said to be the worst dust storm that has ever hit this part of the country, was experienced here on Tuesday afternoon, about 4:30 p.m. The wind had been blowing practically all day and towards the mid-afternoon it became stronger and finally, on observation, one could see a black cloud of dust in the distance, rapidly approaching the town from the north. When this storm hit here everything was enveloped in darkness as if it was midnight. This kept up for about twenty minutes before it began to subside and from then till long after darkness, the dust continued to blow.

Wednesday morning the wind began to blow again and dust was in evidence. Later on in the day a slight flurry of snow came with the wind and the temperature dropped. At the time of going to press on Wednesday afternoon it looks as if a blizzard is in the offing. However, we need the moisture and with that there will be no more dust.

The reason for these frequent dust storms this winter has been on account of the fact that there has been no snow on the ground all winter and with everything so dry any little wind that comes along carries part of some unfortunate farmer's land with it.

Considerable damage has been reported as the result of this wind and dust storm.

LITTLE NEWS ITEMS FROM THE SOUTH

Mr. and Mrs. John Brost, Mr. and Mrs. C. J. Bertsch and Mrs. John Metzger went into Calgary on Thursday and returned Friday.

Mr. Ed. Tucker motored to Calgary on Wednesday with a load of hogs.

Mr. and Mrs. J.R. Guerretaz gave a farewell party on Friday to Mr. and Mrs. Ed. Tucker and children.

Mr. David Schmidt and son Emil, and Mr. Sam Ohlhauser made a business trip into Calgary on Friday and returned the same day.

Mr. Alex Biebrich took a load of cattle into Calgary on Wednesday for Mr. E. J. Bertsch.

Frank and Otto Lemke moved to Rosebud on Monday. They have rented a farm there.

Pete Schmidt came out from Calgary on Sunday and is now visiting with his parents, Mr. and Mrs. J. J. Bertsch.

Mr. Jacob Riser and family have moved east of Rosebud, where they have rented a farm.

Walter Gieck is looking after Henry Kary's filling station while Henry is hauling gravel.

LETTERS TO THE EDITOR

The Editor, The Carbon Chronicle, Carbon, Alberta.

Dear Sir:—

Am only a few years out in Canada. Have been a jack of all trades, so far. At present am in the skillful art of farming, trying to be wise, and everything goes wrong. But, there is one chance for me yet. What I found out recently, and that is in the mail delivery. O' boy! how great to be in the mail business. One has to be a learned man for that! Write money orders out, where Postal notes will do. Fill up your dirty pockets, never mind honesty. Compare to that, it has greater advantage.

As referring to unregistered letters. Every living crook and hobo can fix them. Wonderful! How easy the money comes in. To be sure, it is a most profitable business. Far better than most anything else, nowadays. In short, cheat the people out of their money. Have a long and easy life under pretence of the most friendly service. (What gives every honest man a pain in the neck).

This is a real true story, in puris naturalibus. Eureka! Nothing like it has ever been known. Bless me; that is the job I am after now. Be it so.

THE MEN OF MILK AND MONEY

In the dear dead days we can all recall, an agent would chase a man a hundred miles to sell a heavy farm implement because there was a good commission in it. A little thing like a cream separator was deemed almost too small to sell. Things then were booming on a big scale, everything was going up and never coming down. But one morning some bright mortal stopped snoring, rubbed his eyes and began to wonder what it was all about, a few others also came out of the trance—and then the deluge. It was all right, most people got exactly what was coming to them, but there's no use rubbing it in.

With grain at its present prices, the man who goes out to sell ordinary farm implements isn't going to have the happiest time in the world. He is going to listen to loud and lurid recrimination. Some people act as though he was to blame for the whole thing, and never give him a chance to prove his innocence before whistling for the lean and hungry bull-dog. One of the principal missions of an agent's life is to be around where people can lay most of their bad luck on him.

Times have decidedly changed; the man selling cream separators is selling to the men of milk and money. The ones who were wise enough to keep cows through the hectic days of frenzied finance, and are still keeping them, these men realize more than ever before that it's the staid old cow who carries them through good times and bad. Through days of storm and stress the cow poured her twice a day harvest into the milk pail, each pound representing real money on a cash market—De Laval bulletin.

Carbon Lawn Tennis Club Makes Cut in Annual Dues

REDUCTION MADE IN MOTOR LICENSE FEES

Announcement has been made by the Provincial Government that automobile license fees, as from January 1931, will be reduced by five dollars. It was explained that the Government did not wish to imperil its vast investment in good roads by any reduction in the revenues of the gasoline tax. The five dollar cut in auto license fees is calculated to induce motorists who are now storing their cars, to use them once more.

Refunds will be paid immediately to every motorist who has already purchased his license on the former schedule of fees.

G. OHLHAUSER AND CROWELL ELECTED

The elections in the Municipal District of Carbon on Saturday, February 28th, resulted in two new members on the Municipal council. The elected councillors were Gottlieb Ohlhauser and Hector H. Crowell.

In Division 2 Gottlieb Ohlhauser was elected over Edward Schell by a majority of seven votes. In Division 5, Hector H. Crowell of Nacmne defeated one of the oldest members on the Municipal council, R. S. Near, by a majority of nine votes.

The Municipal Council for 1931 will be Messrs. S.N. Wright; Gottlieb Ohlhauser; W. H. Levins; C. G. McMann; H. H. Crowell; G. H. Webber and O. M. Grieve.

The first meeting of this new council will be held in the Municipal office, Carbon, on Friday, March 13th.

NEWS OF ALBERTA

Drumheller's first annual Horse Sale will be held in that city on Thursday and Friday, March 12 and 13th, and it is expected that a large number of horses will change hands.

According to the Didsbury Pioneer that town is contemplating the formation of a Board of Trade. Farmers in the district are being asked for their assistance in this venture.

The gold prospects in southern Alberta along the Livingstone river are seldom mentioned now, says the Nanton News. If any rich assays have been received they have not been mentioned.

Choked to death when his clothing caught in the driveshaft of a windmill, the body of Otto Riech, 14-year old Calgary boy, was found on the farm of David Miller, 10 miles north-east of Crossfield, on Monday afternoon last.

Several truck loads of drilling equipment belonging to the Hudson Bay Oil and Gas Co. left Brooks last week enroute to the Paintearth No. 1 well, located 14 miles north of Castor. The Sheldon Burden Drilling Co. of New York, has recently turned this

The annual general meeting of the Carbon Lawn Tennis Club was held on Monday night, March 3, at 8 p.m. V. B. Hawkins was elected chairman of the meeting.

The minutes of the last general meeting were read and confirmed, and the balance sheet for 1930 showed a balance of \$49.76.

The following officers were elected for the year 1931:

Honorary President, C. McPherson; President, H. C. Willson.

Vice-President, V. B. Hawkins; Secretary-Treasurer, W. A. Braisher.

Executive Committee: the above officers together with Mrs. H. Willson, Miss Irene Nash and W. Poxon Jr.

Fees for 1931 were set as follows: Seniors—Men \$3; Ladies \$2.00.

Public School Students, \$1.00, with use of only one court after 6 p.m.

High School students, \$1.00 with the same privilege as Public School Students, or \$2.00 with same rights as Senior Members.

A hearty vote of thanks was passed to the retiring president, Len Poxon, for the services he rendered the Club during his year of office and his energy and tact in handling many difficult matters that arose during 1930.

WHEN SPRING COMES

Poets tell us that spring is the season when youthful fancies "lightly turn to thoughts of love." Mothers of growing boys and girls are apt to view with alarm the first indications of the love instinct in their children.

What to do when these teen-age problems face them square in the face is a difficult and perplexing question. The wise mother will try and solve it in an intelligent manner and gain her child's confidence. Questions of the origin of life must be met truthfully and very thoughtfully.

The coming of the spring with the mating of birds, the budding of trees, the sowing of seeds is a fine opportunity for parents to have a heart to heart talk with their growing boys and girls on life. Getting closer to Nature and studying Nature's laws, should be the guiding star in this difficulty of wondering what to tell the children.

Reading literature on Sex Hygiene is also a real service. In the Free Health Library of the Red Cross Headquarters is an interesting booklet "Tell your children the truth." It deals delicately with the important questions of sex. A limited number of these are obtainable free on request to Red Cross 407 Civic Block Edmonton.

Lady: How much will I have to pay for a pair of silk hose?

Clerk: About two dollars.

Lady: They come rather high don't they?

Clerk: Yes, but remember, you're a rather tall lady.

Thrift --- Waste

At the present time people in all walks of life, individuals, corporations, governments, are deeply concerned over the prevailing business depression, unemployment, loss of purchasing power, accumulation of debts. Everywhere people are seeking to learn the primary cause with a view to applying a cure; they are anxious not only to overcome existing conditions, but to ascertain the cause with a view to preventing a recurrence of such conditions.

Some talk learnedly of the world's supply and distribution of gold, which is the basic standard of all international business. Others complain of over-production, although the more generally accepted view now is that the world suffers not so much from over-production as under-consumption. Enormous war debts imposing heavy taxation on all, are held by some to be the underlying cause. Restrictive tariffs, shutting off nations and interfering with the free flow of trade, are blamed by others. Faulty and unduly expensive methods of distribution from primary producer and manufacturer to the ultimate consumer are responsible, so others contend.

But when all these, and a multitude of other things are considered and given their due weight, does not the basic cause lie much nearer home for the average individual? Is it not because of a lack of thrift, the indulgence in habits of waste, that many persons find themselves in financial difficulties?

The writer can well imagine the reader saying to himself that the present is not the time to talk about thrift, when people have little or nothing to save and cannot indulge in waste because they have nothing to waste. But, the writer contends, this is, therefore, the most opportune of all times to advocate thrift and condemn waste. It would be a mistake to remain silent until times are booming again, because people then are in no mood to listen. It is when a dollar looms up big, big as ten dollars when times are good and business brisk, that people are more willing to give heed to the benefits of thrift. When money comes easily, it usually goes just as easily, but when it is hard to get we are the more inclined to hold on to it.

In his autobiography, the late Edward Bok, the famous editor of "The Ladies' Home Journal," tells how, when he came to America as a lad of six from his native land (the Netherlands), the most wonderful lesson for him was the necessity of thrift. He had already been taught that thrift was one of the fundamentals in a successful life; his family had come from a land noted for its thrift; but, he says, "we had been in the United States only a few days before the realization came home strongly to my father and mother that they had brought their children to a land of waste." Where, says Mr. Bok, the Dutchman saved, the American wasted. There was waste, and the most prodigal waste, on every hand. It was, he says, an easy calculation that what was thrown away in a week's time from Brooklyn homes would feed the poor of the Netherlands.

Continuing, Mr. Bok says: "At school, I quickly learned that to 'save money' was to be 'stingy'; as a young man, I soon found that the American disliked the word 'economy,' and on every hand as plenty grew spending grew. There was literally nothing in American life to teach me thrift or economy; everything to teach me to spend and to waste. I saw men who had earned good salaries in their prime, reach the years of incapacity as dependents. I saw families on every hand either living quite up to their means or beyond them; rarely within them. The more a man earned, the more he—or his wife—spent. I saw fathers and mothers and their children dressed beyond their incomes. The proportion of families who ran into debt was far greater than those who saved. When a panic came, the families 'pulled in,' when the panic was over, they 'let out.' But the end of one year found them precisely where they were at the close of the previous year, unless they were deeper in debt."

Is it not true,—we ask the question advisedly,—that many of us are in financial difficulty today because, instead of exercising thrift when times were good, and putting aside a little against the day when times might not be good, we spent to the limit of our earnings, possibly beyond, in the belief that times would always be good, and now we are in trouble with no reserve to fall back upon? Is it not true that we were wasteful, perhaps not in big things, but in numerous little ways, carelessly expending a dollar here and a dollar there which, if saved, would be a veritable godsend now? In these days of world depression, France has been quoted over and over again as the nation least affected and with less unemployment than any other great nation. Why? Because the French people are notoriously frugal; they save their pennies; they waste little.

But we in this new world, with far greater natural wealth and wider opportunity, are wasteful, extravagant, spendthrift. And the result, when depression comes and with no reserves, we suffer. Is not, perhaps, the real, the underlying cause of much of our present difficulty to be found in this unfortunate trait in our people? Think it over, each for himself or herself.

Too much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms, such as headaches, gas, heartburn, etc., will disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine, prescribed by doctors for conditions due to excess acid. It is always a liquid; it cannot be made in tablet form. Look for the name Phillips' and the word genuine in red.

(Made in Canada)

Taking the Census

Army Of 15,000 To Be Engaged In Huge Undertaking

Three times as many persons will be needed to complete Canada's decennial census this summer as Wolfe had when he stormed the Quebec citadel to annex the country to the British Empire, states R. H. Coats, Dominion statistician. On June 1 next a veritable army of 15,000 men and women will begin enumerating the population of the country, gathering eugenic and racial information and social and economic records.

It will be the seventh census since Confederation and will be unique in that unemployment figures will be gathered and information regarding hospitals, asylums and child welfare institutions.

As head of the enumeration and compilation staff, Mr. Coats sought the co-operation of all Canadians, asking that they furnish accurate information when interrogated and expedite proceedings as much as possible.

Acids In Stomach Cause Indigestion

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach. The delicate stomach lining is irritated, digestion is delayed and food sour, causing the disagreeable symptoms which every stomach sufferer knows so well.

Artificial digestants are not needed in such cases and may do real harm. Try laying aside all digestive aids and instead get from any drugist some Bismarck Magnesia and take in water right after eating. This sweetens the stomach, prevents the formation of excess acid and there is no sourness, gas or pain. Bismarck Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and is the most efficient form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

Wagner Festival

Toscanini Will Conduct Performances Of Tannhauser At Bayreuth

Toscanini, Furtwaengler and Elmendorff will be conductors at this year's Wagner Festival to be held at Bayreuth. This will be the second year in succession that this honour has gone to Toscanini.

Born in Parma, Italy, in 1867, Arturo Toscanini has had a brilliant musical career. He received his early training at Milan Conservatory and in the year 1908 was appointed to the conductorship of the Metropolitan Opera House in New York, which position he retained until 1931.

To the thousands who attended the festival last year his conducting was a revelation and completely vindicated the faith of those responsible for the breaking of the tradition that only a German was capable of interpreting Wagner.

Boris Hambourg, of that famous Canadian quartette known as the Hart House Quartette, all of whom attended the festival, described the conducting of Toscanini as being nothing short of marvellous. In all his interviews on his arrival at Montreal on the Cunard liner "Ascania," after the festival, Hambourg had nothing but the highest praise for the Italian conductor.

Arturo Toscanini will, this year, conduct all performances of Tannhauser on July 21st and August 1st, 5th, 8th and 17th. He will also conduct "Parsifal" on July 22nd and August 6th, 9th and 19th. It was originally intended that Dr. Muck would conduct "Parsifal," but owing to a very serious illness has been compelled to withdraw. Dr. Muck is a musician who has been brought up in an atmosphere literally steeped in the Wagner tradition, and it was with great regret that he has had to discontinue his Bayreuth activities.

This year Herr Furtwaengler will be musical director-general of the Bayreuth Festival Plays, and will conduct "Tristan" himself. Carl Elmendorff will again be the conductor of the "Ring of the Nibelung."

Convenient sailings can be arranged via the Cunard Line for those wishing to attend the festival and each Friday during July and August there will be two Cunard-Anchord-Donaldson liners sailing from Montreal for Great Britain and the Continent.

London now has 20,000 men on its police force.

Aviation In Alberta

Alberta Flyers Have An Envious Record Of Performance

Alberta fliers, fewer in number than those of the majority of the provinces in Canada, are among the most active, to judge from the latest figures from the Department of Civil Aviation, which show that during the year 14,950 flights, during which about 500,000 miles were covered, were undertaken. Alberta fliers during the year spent 6,415 hours in the air, the average flight lasting for 25 minutes. The planes carried 12,169 passengers.

Distemper responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

The Roman Coliseum seated more people than the Yale Bowl, the former accommodating 87,000 people.

Awarded Trophy

The French section of the International League of Aviators voted the 1930 trophy for outstanding aeronautical accomplishment to Dieudonne Coste and Maurice Bellonte, for their Paris-to-New York flight. A medal of honor was awarded Jean Mermoz, French pilot, who flew to Brazil.

Use Of Fertilizers Throughout Western Canada Would Greatly Increase Production

That the use of phosphatic fertilizers throughout Western Canada would increase the acreage yield and would lower the cost of production sufficiently to enable Canadian farmers to better compete with low grain prices on the world market, was the statement made at Moose Jaw by Dr. Ray Neidig, of the Consolidated Mining Conference of the Moose Jaw Agricultural Society, held in the Grant Hall Hotel.

Dr. Neidig was explaining the results of experiments made throughout the prairie provinces during the past four years, to establish the feasibility of using phosphatic fertilizers in increasing the grain yield and promoting early maturity and to illustrate his points, showed actual pictures of fields in the three provinces where the new fertilizer had been used successfully.

Thomas Teare, president of the local agricultural society, presided over the dinner meeting, which was largely attended, while a short address was also given by J. C. Mitchell, Dahinda, former world's "wheat king," who told briefly of personal experiences with the new phosphatic fertilizer, and his belief that it would be a practical boon to Western farmers.

In his opening remarks, Dr. Neidig stated that concentrated experimentation over a period of four years had proved conclusively that when the new fertilizer was drilled in with the grain at the time of seeding, it resulted in earlier maturity and more rapid growth of the plant, while the yield was increased appreciably. Over 400 Saskatchewan farmers had co-operated with the provincial department of agriculture in making trials with the new fertilizer, he stated further, and it was proved that to be effective with grain crops, must be drilled in with the seed.

Showing slides, the speaker pointed out that not only would the loss of crops be avoided but the quality of the grain would be retained. The fertilizer had been used with effect on hay lands and various grass crops, while in Southern Alberta it had been used to advantage on sugar beet crops where it had increased the yield from two to seven tons per acre, and had slightly raised the sugar content, besides maturing the crop from five to seven days earlier than normally.

"So when we realize the interdependence of plant nutritious soils and climatic relationships," he concluded. "We can better understand why the drilling in of small quantities of phosphate with our seed will bring about such remarkable increases in the yield of our crops and their earlier maturity."

A Worth-While Invention

Written words may be sent over a telephone line by use of an attachment devised by German telephone engineers, who now are testing it. Should the listener have difficulty in understanding a spoken word he asks the speaker to spell it, and it appears before the listener in writing. German long distance lines are expected to first use the attachment.

"You had leave yesterday afternoon to go to see your doctor, and an hour afterwards I saw you in a cafe with a man, playing cards."

"That was my doctor."—Hummel, Hamburg.

W. N. U. 1879

Story Of Lost Mine

Reported Discovery Of Gold and Platinum In Alberta Foothills Has the lost "Leman mine" been rediscovered.

The reported discovery of gold and platinum in the Livingstone range in the Alberta foothills country just south of Turner Valley oil field, has revived the saga of the legendary "lost mine."

Told by old-timers of the district, the story is that a man by the name of Leman discovered a rich white gold mine somewhere west of Nanton in 1870. He was aided, it was said, by friendly Indians.

Following the discovery Leman returned to Idaho to bring his wife and family to Alberta, but on the return journey all met death, either by an Indian attack or drowning. White men could never locate the mine, and the Indians alone knew its secret.

Today with the report of a rich find the pioneers of the district recalled the early day legend.

More than 100 claims have been staked in the area, which is 100 miles northwest of Lethbridge.

After 15 years' search, two prospectors of Staveland, Alberta, made the discovery of the gold and platinum bearing veins, and scores have gone into the Livingstone region.

(By Eva A. Tingey.)

FOR DAINTY DAUGHTER

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Any little miss would love this wool challis frock. It is French blue overlaid in fine stripes, with plain matching shade used for the yoke, panel front and the cuffs.

It is the cutest thing to make. Pin tucks at either side of the front and the back are decorative.

To give easy movement, the dress widens into comfortable flared fullness toward the hem.

Other attractive combinations are orchid and white checked gingham with plain orchid, yellow pique with white pique and Nile green linen with white linen dotted in green.

This pattern may be obtained in sizes 2 to 6. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

A New Food Product

Experiments Now Under Way To Manufacture Honey-Butter

One of the most interesting announcements in the field of agricultural research and endeavor comes in a recent account of experimental work now under way with the object of combining honey and butter into a food product called honey-butter. This work is now engaging several workers in dairy and honey research and definite results have already been obtained in the direction of producing such a commodity.

The idea, which by the way is Canadian in its origin, is to bring to the market a product which will be used for sandwich and picnic purposes with very definite possibilities of becoming a standard household article. The term honey-butter certainly has a tasty sound about it if this is to be any criterion.

An interesting speculation in connection with this piece of work is in connection with the age old combination of milk and honey as a description of lands of unusual fertility and verdure. Milk and honey have become symbolic of much that is good and their value as nutrients has never been questioned. The combining of honey with the most famous product of milk should certainly give rise to a product of unusual food qualities.

From the standpoint of the bee-keeper as well as the dairyman, the establishment of such a commodity should also lead to an increased consumption and wider markets. Honey-producers have been endeavoring for many years to get a wider recognition and use of honey as a food and the turning of a considerable portion of the surplus into the manufacture of honey-butter would probably mean more to this industry than many years of publicity.

We shall be watching with interest for the appearance of this food on the market and let us hope that it proves as palatable as the ingredients would indicate.

Where Four States Meet

Only One Spot Where Four Boundaries Touch Same Point

At one place in the United States it is possible to stand with the heel of the right foot in one state, with the toe of the right foot in another, with the left heel in a third and the toe of the same shoe in a fourth state. This unique spot is where the boundaries of Colorado, Utah, Arizona and New Mexico meet. It is the only place in the country where four states meet at the same point.

Czecho-Slovakia now has 350 football fields, and 1,345 tennis courts.

DANCES WITH PRINCE OF WALES

Miss Betty Gardner, of Brockville, Ont., daughter of Mr. and Mrs. J. Gill Gardner, who was the Prince of Wales' partner for four dances during his recent visit to Kingston, Jamaica, on his trip south to the Argentine. Miss Gardner's father is a director of the hotel at Kingston.

Revolving Loan Plan To Aid Western Canada Farmers Is Outlined By C.P.R. President

New Egg Storage

Air Is Replaced By Carbon Dioxide Gas In New System

Gas storage, a new development in keeping eggs fresh until the market is ready to absorb them, is interestingly described in the current issue of the News Letter of the Dominion Dairy and Cold Storage Branch at Ottawa. Briefly described, the eggs packed in 15-dozen packages and placed in a metal container known as an Autoclave. When these are placed in the storage compartment the air within the Autoclave is pumped off and replaced by carbon dioxide gas. As a further precaution against the presence of oxygen in or near the eggs the air outside the container is also drawn off and replaced by CO₂. Theoretically, and it is proving true in practice, an egg stays fresh directly in proportion to the extent to which it contains CO₂, and the two bug-bears of cold storage, mould growth and fungi, can develop only in the presence of oxygen with a humidity of 85 degrees at temperatures of 33 degrees Fahrenheit or over. Owing to the absence of oxygen no mould growth takes place and the egg comes out of storage in a most attractive condition.

Demand For Mutton

Domestic Market Is Increasing According To Latest Figures

In 1927, Canada's consumption of sheep and lambs stood at 6.09 pounds per capita per annum, and by 1930, this had increased to 7.10 pounds. This increase of one per cent., roughly, is seemingly small, but, as pointed out in a circular letter of the Canadian Co-Operative Wool Growers, Limited, it is really impressive. "With our present population of about ten million people the one pound increase represents 10,000,000 pounds or about 300,000 animals or eight per cent. of our total sheep population."

Goat Raising In B.C.

Interest in goat raising continues at a high point in British Columbia. During last year five herds were entered in the record of performance test for goats, ten head having qualified. The highest test was made by a Nubian doe, "Shirley Rona"—296—owned by Harold G. Morson, of New Westminster, whose milk yield was 2,595 pounds and butter fat 132.4 pounds.

Proposals in connection with the organization and operation of the Dominion government's \$5,000,000 revolving loan fund to aid Western Canada farmers were outlined by E. W. Beatty, K.C., president of the Canadian Pacific Railways. Mr. Beatty was first proponent of the idea, definitely announced by Premier R. B. Bennett at Regina, December 30.

The railway head offered two major suggestions for officials named to handle the fund, which has been placed in the hands of the newly-chartered Dominion Agricultural Credit Corporation. No burden of handling charges should be imposed on the farmer, he thought, and the safety of the investment must be assured.

"The policy must be operated in such a way," he said, "so as not to impose a burden on the farmer in the matter of handling charges, interest, etc., but rather to provide him with a greater stability in earning power at the very minimum of cost. It must also insure the safety of the investment so that the capital of the loan corporation is not impaired."

He reiterated his belief, first declared at London, Ont., last December, that the plan would "improve conditions under which farm operations are carried on in those districts where its credits can be properly used."

In some particulars, Mr. Beatty thought, the credit body should function similarly to administrators of the "Minnesota plan." He thought it "might be advisable" to adopt the United States minimum and maximum loan clause. This would set loans at \$200 to \$1,000. "However," he added, "I would not favor the granting of the maximum amount except under special circumstances."

Length of time for which the loans are made also might be adopted from the "Minnesota plan," the C.P.R. president said. Under this three-year plan, the farmer would pay back 30 per cent. of his loan after the first year, 30 per cent. after the second and the balance after the third year.

Mr. Beatty asserted the loan plan here would be operated under vastly different conditions than when it met with "amazing success" in Minnesota. "It will be well to remember," he said, "that their record in the matter of repayment of loans has been achieved in the period when prices and other conditions were comparatively good, that they have a great advantage over this country in the matter of population and, therefore, of consumers, and that greater difficulty may be experienced under more adverse conditions."

"This," he added, "suggests the advisability of some conservatism in the extension of credit at the outset at least." Greater safety in the operation of the loan scheme would be achieved through numerous relatively small loans and, though he said it was not yet possible to estimate cost of managing the credit corporation, "it should be urged that all possible avenues be explored with a view to establishing credit facilities at a rate of interest not to exceed six per cent." said the C.P.R. president. He stressed that the plan is not expected to "work miracles" for the farmers.

"The central idea of the plan should be to seek to develop in favorable communities on the basis of some diversity in livestock, which under different conditions might include two to five cows, one or two sows, 25 to 100 hens and, wherever possible, 20 to 50 ewes per individual farm."

Thirsty For Music

"There may be many opinions as to Johannesburg's taste in music," writes a correspondent of The Cape Argus, of Cape Town, "but there can be no doubt of its thirst for it. One can walk from end to end of the shopping centre of the city without ever being out of earshot of one instrument or another. As often as not you will hear them struggling one against the other in a duel of sound."

WORLD HAPPENINGS
BRIEFLY TOLD

Mrs. George Dewey, widow of the hero of Manila Bay, died at her residence in Washington.

The British Columbia Government favors federal rather than provincial control of radio in Canada, is its reply to a query from Ottawa.

Sir Robert Burnett, 79, who was physician to the Marquis of Lorne, when he was Canada's governor-general, is dead.

Appointment of John A. Stiles as chief executive officer of the Boy Scouts Association in Canada, has been announced by the executive committee of that body.

The 18th amendment has been sustained as valid by the Supreme Court. Under the decision the government will continue its efforts to enforce the Volstead law.

Walter Lindrum, the famous Australian billiard player, was summoned to Buckingham Palace to give a demonstration of his skill before the King and Queen.

The conferment by the King of an earldom upon Viscount Willingdon, former governor-general of Canada and viceroy-elect of India, is announced in the Official Gazette.

Sir Alexander Gibb, noted British port authority, has been invited to investigate the technical and business features of the ports of Halifax, St. John, Quebec, Montreal and Vancouver.

"Big Bill" Thompson, invincible as ever, won his fourth mayoral nomination in the Republic primary election in Chicago, defeating by a plurality estimated at 45,000 Judge Joe H. Lyle.

MacMillan's Equipment
Will Include 'PlanesArctic Explorer Outlines Plans For
Trip Into Baffin Land

Donald B. MacMillan, Arctic explorer outlined plans for an expedition into Baffin Land and the North Polar region next summer. The expedition, he said, would be in three sections—the first sailing from Wiscasset, Maine, June 20, to be followed by Dr. Alexander Forbes, of Boston, and Sir Wilfred Grenfell, of London. Three aeroplanes will be included in the equipment.

One of the principal objectives, he said, would be the study of glaciers to determine the possibility of the formation of another "glacier age."

Persian Balm promotes daintiness, charm and beauty. It is unrivalled in its magical effect on the skin. Swiftly absorbed by the tissues, it leaves never a vestige of stickiness. Delightfully cool to the skin. Stimulating and invigorating. Softens and makes the hands flawlessly white. Subtly fragrant. Imparts youth and loveliness to the complexion. Persian Balm is the inevitable choice of the woman who cares.

Discover New Land

New land has been discovered in the Antarctic by the Norwegian whaler, Torlyn, the whaler reported in a wireless message. The new land, the message said, is a continuation of Mt. Robertson Land, which Sir Douglas Mawson discovered last year.

Wretched From Asthma. Strength of body and vigor of mind are inevitably impaired by the visitations of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dissipates the cloud by removing the cause. It does relieve. It does restore the sufferer to normal bodily trim and mental happiness.

A new cable between Sweden and Germany contains a special line for radio broadcasting.

Street singers of Brighton, England, now must get permits from the city.

GILLETT'S

cleans the bathroom
in half the usual time

■ Full strength for Sink Drains ■ Full strength for the toilet bowl ■ In solution for general cleaning

GILLETT'S Lye "Eats Dirt"

Flake Lye

* Lye should never be
dissolved in hot water.

ONE tablespoonful of Gillett's Lye dissolved in a gallon of cold* water provides an ideal, safe solution that quickly cleans everything in the bathroom.

Use it to wash walls, the floor, in the sink and bathtub . . . and remember, when you use Gillett's Lye, each is disinfected as well as cleaned with the one operation.

Once each week, pour full strength Gillett's Lye down the closet bowl and it will always be clean and free-running.

Gillett's Lye has dozens of other handy household uses. Send for the new FREE Gillett's Lye booklet describing the many ways it will help you with all your cleaning.

British Air Ministry
Has Difficult TaskEvery Day Amount Of Sunlight
Penetrating City Is Measured

One of the most difficult tasks in London is carried out daily at the Air Ministry offices, where the amount of sunshine penetrating the city is measured. The measuring apparatus consists of a small glass ball through which the heat of the sun passes to burn a special paper placed beneath it, the mark on the paper being used to compute the amount of sunlight passing through.

She Couldn't
Be Hoodwinked.

Miss E. Thomson, of Clapham, writes:—"I find that Carter's Little Liver Pills will do more to keep the complexion clear, and the skin free from blemishes, than all the face creams I have used. I found the real cause of face blemishes was usually due to liver and stomach troubles. My druggist recommended them as a specific for stimulating the liver and expelling the constipation poisons from the system." Take Carter's Little Liver Pills for sick headache and indigestion. All druggists 25¢ and 75¢ red pkgs.

Work For Russian Women

Soviet Government May Employ
Women To Overcome Labor
Shortage

Employment of hundreds of thousands of women in industries to overcome the present serious shortage of labor, is being considered by the government of the Soviet Union.

With thousands of jobs for which there are no takers, the country today has the greatest shortage of labor in its history. With millions of women inactive it is believed the problem could be solved by pressing them into service. The children would be cared for by the state while their mothers are working.

Time Has Tested It.—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

A Worth While Achievement

American tourists returning from Europe report that beards are coming back into style. It is doubtful if they will ever again attain great popularity in America. But if some superscientist would advise a way to transpose the ever abundant facial hairs of the male to the uppermost portion of his cranium—ah, there would be an achievement.

Government and private steel works in Japan may be merged.

Test Was Convincing

New Fool-Proof 'Plane Will Land
Itself Safely

A fool-proof aeroplane which its inventor claims will neither stall, spin or dive and will land itself, is the latest contribution to safety in the air.

While more than an hundred aeronautical experts and financiers watched the 'plane was successfully tested at Glenn H. Curtiss airport, New York. Piloted by Henry White, it made a half dozen short flights, and came to a near-perfect landing each time with the pilot's hands high above his head.

The designer is A. A. Merrill, of White Plains, N.Y., formerly in charge of aeronautical research at the California Institute of Technology, and a contemporary of the Wright Brothers, Octave Chanute and Langley. He has been working on the 'plane since 1913, and at one time was forced to mortgage his life insurance to continue.

Movable wings which can be adjusted over an arc of 14 degrees are the secret of the 'plane's stability. In flight these restricted flying surfaces prevent a pilot from unwittingly going into a stall or a dive. In landing, they mechanically level off at the proper distance from the ground and assume the proper gliding angle.

Alberta-B.C. Boundary

Legislation has been brought down in the British Columbia legislature by Hon. N. S. Lougheed, Minister of Lands, approving the Alberta-British Columbia boundary as surveyed by a joint commission between 1913 and 1924.

When
BABIES
are Upset

BABY ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea. How would you meet this emergency—tonight? Have you a bottle of Castoria ready?

For the protection of your wee one—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria.

SUNDAY SCHOOL LESSON

MARCH 8

THE GOOD SAMARITAN

Golden Text: "Thou shalt love thy neighbor as thyself."—Leviticus 19. 18.

Lesson: Luke 10.25-37.

Devotional Reading: Matthew 5. 38-48.

Explanations and Comments

The Law Of Love To God and Man, verses 25-28.—One time a scribe, an expert student and expounder of Hebrew law, sought to test Jesus by asking him a hard question. "What shall I do to inherit eternal life?" he queried, and by this he meant What acts, such as fasts and prayers and sacrifices, would have special merit and would therefore be rewarded by life eternal? "What is written in the law? How readest thou?" thus Jesus bade him answer his own question. The scribe then quoted Deuteronomy 6.5 and Leviticus 19.18: "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind (i.e., with all thy powers); and thy neighbor as thyself. That Jesus united the two, love for God and love for one's neighbor, is not surprising, but that the Scribe does so causes one to surmise that it was brought about by some remark of Jesus which is not recorded. "Thou hast answered right: this do, and thou shalt live," said Jesus.

"Oh, runs not thus the lesson thou hast taught? When life's all love, 'tis life; aught else, 'tis naught."—Lanier.

What it means to love man, the parable that follows explains, but what does it mean to love God? Dr. Frederick W. Robertson says that it can mean only one thing: God is Character, and to love God is to love character. For instance, God is Purity, and to be pure is to love God. God is Love, and to love men is to love God. God is Truth, and to live a brave, true, real life, that is to love God. So Whittier, in one of his letters wrote: "I have no consciousness of loving God as a Person, or Power, apart from His attributes. I have no experience or ecstatic emotions, but I know that I love goodness and mercy, charity and peace; that my soul longs for harmony and moral symmetry; that I would sooner wrong myself than my neighbor; and, at times, the sweet sense of an Infinite love overwhelms me and fills me with gratitude and thanksgiving."

When a mother detects from the writhings and fretting of a child that worms are troubling it, she can procure a reliable remedy in Miller's Worm Powders which will expel all worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these Powders are used.

Japs Angry At Soviets

Feeling against Soviet Russia is rising rapidly in Japan at the report that the Soviet Union has threatened to cancel the Japanese fishery concessions in Siberian waters because of a default by Japan in payment of royalties which were over due.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Young Wife: "I learnt to cook while my husband was abroad."

Mother: "Well, and what did he say when he returned?"

Young Wife: "He went abroad again."

SEA HARBOR FOR PRAIRIES TO OPEN SOON

Winnipeg, Man.—In a few weeks workmen will toll again at Churchill. They will start the last six-month lap on a job that is to give the northern harbor a 2,500,000-bushel grain elevator with the second largest warehouse in the world.

Storage will mean but little to the sprawling bins ranged along the south shore of the rock-girt harbor at the end of the Hudson Bay Railway. But ability to handle grain—to dump cars, to clean, weigh and separate the grain, to run it out to waiting ships—will be a paramount necessity for the elevator at the port with a winter-shortened season.

More than 500,000 bushels daily may pour through the varied processes of the Churchill elevator's warehouse when work is completed in the middle of next September. Only the great Pool Elevator Number Seven, at Port Arthur, will be able to handle grain more rapidly than the terminal "north of 58." If the Churchill plant is ever pressed to capacity the route will be a success.

About 750,000 bushels of wheat will be rushed overseas this fall between the time the elevator is ready September 15 and the close of navigation on the Bay, according to the promise of Dominion authorities. Some organizations in the west are pressing for a shipment of as much as 5,000,000 bushels this fall, but it is understood from reliable sources that such a flow of grain in the brief available time would tie up dock work in progress and threaten the efficiency of elevator and dock facilities.

At the present moment, ground-work on the elevator is completed to the first floor. In late March it is expected construction of the power house will commence alongside the elevator. In May, concrete pouring begins on the elevator and the warehouse, from the ground floor upward. Work on shipping galleries, too, must be hurried in order to have them ready for the restricted shipping of this fall.

Across the harbor from the historic Fort Prince of Wales, the new elevator will reach out 500 feet along the shore line and tower 200 feet against the north's grey sky. Close by are the terminal yards of the Hudson Bay road, which rolls northward over 500 miles of muskeg country from The Pas, itself on Manitoba's frontier.

All Canada will be watching when the mechanism of Churchill's port moves into real action this fall—more than 300 years after the Dane, Jans Munck, first eased his boat into the mouth of the Churchill River to spend the tragic winter that cost the lives of all but three of his 64-man expedition. This fall comes the test of Canada's greatest experiment for many a year—the building of a sea harbor for the prairies.

Seeking Pensions For Blind

Manitoba Asking Federal Government To Finance Scheme

Winnipeg, Man.—Dominion parliament is called upon to implement a pension scheme for blind persons in a resolution adopted in the Manitoba Legislature.

The resolution was sponsored by William Ivens, Labor member for Winnipeg. The pensions for the blind would be financed in whole or in part by the federal government.

Well Supplies Boiling Water

Vimy, Alberta.—Leo Chaput, farmer of this district, is taking things easy these days. Not for him is the worry of boiling water with which to brew his favorite cup of tea, for shaving water or the long-deferred ablution. He recently tapped a well that supplies him with ready boiled water all the time. Mr. Chaput has sent two bottles of the water to the University of Alberta for analysis.

W. N. U. 1879

Women Mushers Staging Race For Championship

One Of Feature Attractions At The Pas Dog Derby

Winnipeg, Man.—A duel over the snow-swept trails of Northern Manitoba to settle the title of woman dog mushing champion of the world, with a side bet of \$1,000, promises to be one of the feature attractions of dog derby week at The Pas as a result of developments, announced by A. E. Warren, vice-president Canadian National Railways, patron of the northern classic. Early this winter Miss Thula Geelan, girl musher from McCall, Idaho, recognized as the leading musher in the western states, challenged Mrs. E. P. Ricker, of Poland Springs, Maine, to a 25-mile dog race for the mushing championship of the fair sex. She asked for a side bet of \$1,000 to be posted before the race. The contest would take place over a course here selected by the dog derby committee.

The dog derby committee of The Pas has received a wire from Mrs. Ricker accepting the challenge. Both women are expected to take part in the 200-mile dog race from The Pas to Flin Flon and return starting March 20. Miss Ida Carriere, another woman entry, is also training over northern trails for the long race.

Three of the northland's most fearless mushers, St. Godard, Earl Brydges and "Shorty" Russick, left Winnipeg via Canadian National Railways for The Pas, Man., where they will whip their dogs into shape for the gruelling 200-mile race.

Important Ruling By Alberta Supreme Court

Collection Of Fees Under Dominion Charter Is Illegal

Calgary, Alberta.—Fees assessed by the Lieutenant-Governor-in-Council on companies with a Dominion charter cannot be collected, according to judgment of the appellate division of the Supreme Court of Alberta.

The question arose in an action taken by the attorney-general of Alberta against the Royalite Oil Company for collection of a fee imposed by the provincial government through the Lieutenant-Governor-in-Council and under the Alberta Companies Act.

Unemployed Make Trouble

Girl and Two Policemen Injured In Toronto

Toronto, Ont.—Two policemen, a ten-year-old girl and a woman were injured when at least 2,000 of Toronto's unemployed gathered at the corner of Spadina Avenue and Dundas Street, in the downtown section, where a proposed unemployment demonstration was to be held.

Seven demonstrators were arrested when stones, bricks, and other missiles were directed at the police, who retaliated by a charge along the thoroughfare.

Win Cavalry Cup

Manitoba Mounted Rifles, Portage la Prairie, Awarded Honor

Ottawa, Ont.—Manitoba Mounted Rifles, Portage la Prairie, won the Canadian Cavalry Association's signaller-challenge cup with a score of 5,536 points out of a possible 5,743, it was announced here recently. Eighth Princess Louise Hussars, New Brunswick, came second with 4,246 points.

Oxford Rifles, Woodstock, Ontario, won the Infantry Signallers' competition with 5,656 points.

May Amend Mining Act

Ontario Introductory Bill To Bar Speculators In Townsites

Toronto, Ont.—Speculators who rush into mining areas and avail themselves of the privilege of filing on claims which they hope to develop into townsites, hot-dog stands, or barber shops will be frustrated in future under the provisions of the bill to amend the Mining Act, introduced into the Ontario legislature by Hon. Charles McCrae. All claims must be developed as mines and not as real estate speculations under the amendments planned.

NOTABLE STATESMAN

Sir Laming Worthington Evans, 62, secretary of war in the last Conservative government of Great Britain, who died February 13, had a distinguished political career and was one of the mainstays in the high councils of the Conservative party. As a great lawyer he will be remembered by Canadians principally as the London solicitor appointed by the English courts to realize assets of the British America Company, the London Globe, and other Whittaker Wright concerns after the great financial smash in 1901.

Sign Wheat Agreement

Sixteen European Nations Sign On Disposal Of Wheat Stocks

Paris, France.—At the French foreign office, 16 European nations signed the final act for the disposal of the wheat stocks of the central and European states. Russia was not invited to the conference. Russian wheat, therefore, was not included.

The signatory states are Germany, Austria, Bulgaria, Estonia, Finland, France, Greece, Hungary, Italy, Latvia, Poland, Lithuania, Rumania, Switzerland, Czechoslovakia, and Yugo-Slavia. Seven persons did not sign. They are Britain, the Irish Free State, Belgium, Denmark, Spain, the Netherlands, and Sweden.

Report Is Denied

Ottawa, Ont.—"No fixed discount from list prices has so far been placed for duty purposes on books imported into Canada from the United States for sale." This was the statement made at the Department of National Revenue in referring to a report that a fixed discount of 49 per cent. was to be applied generally on books imported from the United States, effective April 1.

Northern Trade Route

Insurance Rates To Be Lower Than Expected Out Of Hudson Bay

Ottawa, Ont.—Within the past three weeks there has been a sudden and in many ways completely unexpected interest on the part of Canadian, British and foreign shipping companies in the Hudson Bay route.

Hon. Dr. R. J. Manion, Minister of Railways and Canals, declined to discuss these recent developments. He will make a detail statement in parliament, by which time it seems certain that definite plans and commitments will have been reached which will assure Fort Churchill a striking opening, and ensure the future success of the new trade route.

It is learned authoritatively that several large steamship companies have come forward and declared their intention of placing ships on the new route. This applies to British and foreign shipping. There has been a most remarkable reaction among Canadian ship operators, who see tremendous possibilities in the development of inter-provincial trade. Maritime provinces companies are going to try to develop trade direct with the prairie provinces. British Columbia companies already have completed plans for a trade in lumber, with cargoes of wheat outgoing from Churchill to foreign ports, and a return cargo from foreign ports to Vancouver.

These shipping interests have taken a firm hand in matters of insurance and cargo rates. Lloyd's, of London, England, have been stirred up and it may be announced definitely that the insurance rates out of Churchill will be much lower than hitherto has been expected.

To Oblige the Prince

Revolt In Peru Is Held Off Until Departure Of His Royal Highness

Vina Del Mar, Chile.—Reliable persons reaching here from Peru declared that the revolt in that country was ready to start at the time the Prince of Wales visited Peru only a few days ago, but was held off until the British party had safely left.

The persons who gave the information followed the Prince of Wales' party through Peru and Bolivia. They said that while the Prince of Wales was in Peru a number of officers, who said a revolution was impending, went to the Prince and told him that they would hold it off until he had completed his visit.

Air passages and mail routes in Europe now cover 72,084 miles.

ROYAL BROTHERS AT GOLF

The Prince of Wales and his brother, Prince George, are here seen on the golf links at Panama, C.Z., during a round when they made a short stay at the Canal Zone city on their way south to the Argentine exposition. Note the Prince of Wales' double-decker hat which he uses as guard against the sun.

RUSSIA WOULD TRADE COAL FOR FARM MACHINERY

Montreal.—If Canada will accept \$3,350,000 worth of Russian coal in part payment, Russia is willing to purchase her agricultural machinery, the total value of which will amount to \$10,000,000, according to a plan which Lieut.-Colonel Herbert J. Mackie, former Conservative member of parliament, stated he had laid before the government at Ottawa, on behalf of the Soviet Government. The balance of the debt would be settled in gold, and the Soviet Government is understood to have expressed its willingness to hold a conference with Canada at which a plan would be formulated for marketing of wheat without dumping.

In the opinion of Col. Mackie some understanding with Russia about the marketing of wheat is expedient. Anticipating the success of the five-year plan and casting an eye on Russia's success in wheat growing up to this time, he seemed impressed with the strength of her position. He feared that unless some agreement were reached with Russia she would undersell Canadians in every market of the world.

As for the opposition against importing Russian coal, Col. Mackie believed that the strongest propaganda had been emanating from American competitors of the Soviet. Russia's purpose is to export anthracite in domestic sizes, a product which could not possibly compete with coal from Nova Scotia. The Russian coal would be in direct competition with the imported American product, Col. Mackie said.

"Canada and Russia must get together on wheat—we must have a conference," said Lt.-Col. Mackie.

"As things are, we bid fair to provoke Russia. At a conference in London, England, with a Canadian trade representative, Saul Bron, the chief Soviet trade delegate to the British Empire, reiterated this plea, and this warning: "Do not put Russia on the defensive." He said it again and again, earnestly, pleadingly.

"I know the seriousness of Bron's statement, possibly better than any other Canadian, for I have made 17 visits to Russia since the revolution, and I know Russia's power to help or hurt my country," to wage economic war or peace.

"High Russian officials have approached Canada through me, asking for a conference. The idea receives the support of the Argentine and Australian government representatives in London, England. Only a few days ago Chairman Legge, of the U.S. Farm Board, said that he could see value, with nothing to lose, in such a conference with Russia.

Well-Known Geologist Dead

Dr. Robert Stewart, Of Toronto, Had Stirring Career

Toronto, Ont.—Dr. Robert Stewart, well-known geologist and medical practitioner, and an authority on mining in the Hudson Bay district, died here last week.

While associated with the Hudson Bay Company and the Ontario Bureau of Mines, Dr. Stewart had a stirring career, being twice shipwrecked on Hudson Bay boats, once in the Bay of Ungava, in 1925, and once off the coast of Labrador, in 1927. His last trip to the North was made in 1928. Dr. Stewart was born in Lucknow, Ontario.

Increase In Autos

Ottawa, Ont.—Canada had a motor vehicle for every eight persons in 1930, as compared with one motor vehicle for every 11 people in 1929, according to a report issued by the Dominion Bureau of Statistics recently. The number of motor cars registered in 1930 was 1,239,889, an increase of 44,295 over the previous year.

An electric light that can be turned on or off by a puff of one's breath was recently exhibited in New York.

Editor and Publisher

CHURCHES

(By Rev. Wm. McNichol)

An article appeared recently in the Christian Herald by Edgar A. Guest, entitled "I'm Glad there's a Church Near my Home." Guest's influence in the field of American Journalism is very wholesome. The article above referred to was provoked by his attending the dedicatory services of a church at Huron City, Michigan. Huron City is a small place. Not even large enough to qualify for a Post Office, and yet it has a church with a seating capacity for 1000. This is due to the fact that every Sunday afternoon during the summer Prof. Wm. Lyon Phelps preaches in the church and people come from a hundred miles around to hear him. Just eight miles away Edgar Guest has his summer home, and he regards it a great privilege to attend regularly the services in this church. Churches are to him symbols of the best aims and aspirations of a group of people. So he is glad that there is a church near his summer home, and many churches in Detroit where he lives during the winter.

Why do people struggle to build churches? "They are not struggling to build churches to debase either themselves or their neighbors. They aren't putting money into them expecting to get large dividends. It isn't a commercial enterprise. The good father who hurls his flock is never going to receive a large salary. The people who sit in the pews will never be told that gambling is worth while, or cheating advantageous. Churches aren't put up like tall office buildings as commercial enterprises. Churches are symbols of group faith. A church stands for something noble and uplifting. It means that if the people who have sacrificed to erect it have their way, there would be less selfishness and less viciousness in the world. It typifies the struggle of humanity for a finer life."

Mr. Guest has heard all the stock criticisms of the church. Ministers are insincere. They are poor preachers, etc. But wait. Did you ever hear the minister who went wrong urge his weakness upon others? Did he try to lead the young astray? Was he hired to deceive or delude? "The poorest sermon I ever heard had no proximity in it. Dull though it seemed to me to be, it would not have altered in the slightest degree for the worse" the youngest member of the congregation who listened to it. Brilliant Parson, and tedious, have this in common—both are earnestly striving to persuade men to cleaner living. But church members do not always live up to their professions. True, but whatever his sin may be, the sinning church member does not contribute to his church to glorify that sin. He sends his children to Sunday school for noble purposes. He wants his children to be clean, and kindly and honest. He wants them to avoid his weaknesses and mistakes. He did not learn his viciousness in the church. He acquired that in spite of her teachers. The church-goer who wrongs another, has forgotten his church."

And so all churches are worth while, because they are a symbol of faith in life eternal. They typify decency, kindness and fair dealing. They offer comfort to the bereaved and sorrowing. With the Golden Rule they would make neighbors of us all. The church

is a hospital for sick and weary souls. It is making a battle, not for its own sake, but for the sake of others. A church in any neighborhood is an asset. Any street is better for its presence. Whenever he sees a church he knows that nearby live people anxious for the best. The church is the proof of it. The church in wood, or brick or stone is a plea for all that is most worthwhile. It offers to give more than it asks. It would end murder, and theft, and jealousy and hatred. It would keep men out of prison. There never was a church erected to drag men down. For that reason, whatever a church may be, I like to see it. The street is better for its presence. It is

the creator and preserver of all that is fine in human life. Read Guest's article for yourself. This is only a short synopsis of it. Then go out and champion its cause in human society.

CROSSED ATLANTIC IN A 45 FOOT SAILING CRAFT

"This is a little more comfortable than my trip from England to Bermuda," declared J. W. Smith of London, England, as the Canadian National steamship "Lady Somers" sailed at sea. The ship "Lady Somers" sailed from Halifax last week, for Bermuda. Mr. Smith, who was a passenger on

the "Lady Somers" crossed from Rochester, England, to Bermuda in 1923 in a 45-foot sailing craft. Referring to this voyage he stated he wished to proceed from England to Bermuda and knew no more economical way of getting there. He made the trip with two companions, the ship being equipped with an auxiliary motor. "Our trip was without incident" said the intrepid mariner, dismissing the subject of his feat.

"Sir," said the maid quite haughtily, "either take your arm from around my waist or keep still. I'm no ukelele."

News Notes

In the past fiscal year in Nova Scotia there were 131 companies incorporated with total capitalization of \$5,367,000, an increase of 13 new companies over the previous year.

Rt. Hon. R. B. Bennett, Prime Minister of Canada, and a graduate of Dalhousie University of 1893, was recently presented with a leather-bound script conveying recognition and regard of nineteen classmates of the same year.

Theodore H. Kipp, chairman of the Industrial Development Board of Manitoba, reports that since the inception of the Board, Manitoba's industrial payroll has been increased from \$18,000,000 to \$35,000,000.

Miss Margaret Stevenson, of Edmonton, has succeeded to the crown of the next Banff Winter Carnival, following Miss Doris Parkes of Vancouver, last year's Queen. The election was the closing feature of a very successful meet.

W. E. Brissenden, of Montreal, has been appointed Development Engineer, Department of Development Canadian Pacific Railway. He succeeds G. M. Hutt who was recently promoted to Assistant Director of Development, with headquarters in Winnipeg.

The 42,500-ton Empress of Britain which is scheduled to sail on her maiden voyage to Quebec, May 29, is the largest vessel built in Great Britain since pre-war days and the largest ship plying between British Empire ports. She will also be the largest vessel ever to make a world cruise.

Total increase in railway taxes during the 38 years from 1890 to 1928 in the United States was from 31 million to 421 million dollars, says Dr. Parmelee, Director, Bureau of Railway Economics. This, he asserts, has had an unfavorable effect both on industries and individuals.

The annual University of Montreal tour across Canada which has been a feature of the educational life of the University for the last six years, will be extended to include Alaska and the Yukon Territories for the season of 1931, according to Canadian Pacific Railway announcement recently.

Shipped by Canadian Pacific across Canada, 27 head of pure-bred Jersey cattle, four pigs, four mountain goats and sheep were swung aboard the freighter Wai-hemo for New Zealand recently. Captain Flynn, skipper of this new Noah's Ark, wasn't worrying. He said he had handled tigers as well as seamen and stokers in his time.

J. H. Evans, Deputy Minister of Agriculture for Manitoba, states that, "in no branch of farm production in Manitoba has the price been so well maintained or the volume of business increased so much as in honey. Manitoba produced well over one-third of the total honey crop in Canada, the quality of which was unexcelled; and at the present rate of increase Manitoba will be the largest producer in the Dominion next year." 708

Progressive

The same enterprising, forward-looking spirit which has been responsible for Canada's rise to greatness finds expression in the progressive policy that for more than 100 years has kept the Bank of Montreal in the forefront of Canadian finance.

BANK OF MONTREAL

Established 1817

TOTAL ASSETS IN EXCESS OF \$800,000,000

Carbon Branch: R. J. FAIRBAIRN, Manager.

Imagination Runs Riot

When he launched the 42,500 ton Canadian Pacific liner Empress of Britain, H.R.H., the Prince of Wales, referring to the Knickerbocker Bar—as the cocktail bar of that magnificent new ship is to be known—said that its frequenters "can let their imagination run riot in a rosy haze amid the fantastic humour of Mr. Heath Robinson."

The Prince referred to the announcement that Britain's foremost humorous artist has been given a free hand to decorate that room on the new liner which is to make its bow to Canada June 22nd next. Developing a humorous legend of the cocktail of his own invention, W. Heath Robinson, who is shown above at work on some of the panels, has prepared a decorative scheme that extolls the virtues of the cocktail and depicts ingenious machinery employed in its manufacture.

Heath Robinson's ideas of the latest labour-saving machinery in connection with the selection and preparation of cherries for cocktail embellishment are shown together with the Foolproof Safety Aeroplane, a direct descendant of the mythical cocktail bird. This ceiling decoration depicts the uplifting powers of an appetizer. These, and other drawings will appear on the walls and ceiling of the room.

DIZZINESS

Caused by Blood pressure

Doctor ordered Kruschen

"Five years ago this month I had a serious attack of blood pressure, and my medical man ordered me to take Kruschen Salts daily. Evidently I am a stubborn subject, because I use every morning a small teaspoonful and a half in a glass of hot water, and this acts splendidly and keeps my head right. If I don't have the action mentioned, I feel cold, stupid and liable to fall from dizziness. Therefore I can't do without my Kruschen on any account. Some time ago I tried some other salts which were cheaper, but they pained me so much that I had to stop them. There is no pain with Kruschen. I have told hundreds of my little wonder-working bottle."—(E. C. Ferguson.)

Dizziness is a symptom of a deeper-seated disorder. It is one of Nature's danger signals—her urgent warning of an impure blood-stream which, if not attended to in time, may wreck the entire health with some dangerous, indeed lifelong, disease. The six salts in Kruschen keep the blood-stream pure and vigorous by ensuring the complete elimination of poisonous waste matter from the system every day.

FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claim for yourself. Ask your druggist for the new "GIANT" 75c. package.

This consists of our regular 75c. bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorized to return your 75c. immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Griffiths Hughes, Ltd., Manchester, Eng. (Established 1756). Importers: McGillivray Bros., Ltd., Toronto.

CHAPTER XII.

"I'll tell you about it now, Gay, if you'll listen."

It was three weeks later. Nick, dressed for the first time, lay in a lounging chair on the porch, while Gay sat beside him, her usually busy hands idle in her lap—her eyes on the babies at play in the sand pile beneath the trees.

"Sure you feel like talking?" she questioned.

"I'll explode if I don't talk! The way you've bullied me into keeping my mouth shut when there's so much to say, and you must have been thinking such abominable things of me."

Gay laughed.

"I never thought anything abominable at all—that is," she added honestly, "after the first minute when

Julie told me that you and Mrs. Halliday had gone alone."

"What did you think then, Gay?"

She reached for his hand, as if in atonement for her disloyalty.

"For just a second, Nick, I wondered if you'd deceived me. And then I was ashamed, horribly ashamed to have had such a thought. I knew almost at once that there was some mistake—something you'd explain when you got home. Even when the whole night passed without you, I didn't distrust you again. I told Mr. Halliday that no harm would come to his wife through you."

Nick kissed her hand. His voice was husky when he said: "I wonder how many wives would give a man the benefit of the doubt at such a time."

"But there was no doubt, Nick, after that first moment. Would you have doubted me?"

He smiled.

"My dear, I wouldn't doubt you if you were gone a week! But that's different. Look here! I want to tell you everything. Of course I didn't misrepresent things, Gay. It was just as I said over the phone. Halliday went to Boston Friday morning, and that afternoon his wife called me up at the bank and asked if I'd dine there. She didn't say he was away, but I suppose I'd have gone in any case. The idea of needing a chaperone didn't strike me. It doesn't yet. If Halliday were alone and you asked him to dine some night when I was out, do you suppose I'd mind? Her asking me was just a neighborly thing to do."

"After dinner she sang, and I tell you, Gay, it was some treat! She sang a lot of the old songs my mother used to sing—Schubert, and Mendelssohn, and some Irish ballads; and ended with that Gypsy thing she sang the night you cried. Do you remember?"

Gay nodded. Would she ever forget? And Nick went on: "We talked a while after that, and she asked about the road to Mason's Falls—said she expected friends for the weekend, and wanted to take them on a good trip. I wondered a little that she should have company at such a time. For all my Gypsy instincts, dear, I'm a Puritan in certain ways. I think she felt my disapproval, for she made a sort of explanation."

Nick paused a moment, then went on quietly: "Gay, I'm sorry for that little woman. Evidently her husband's people don't like her. I gathered that the mother-in-law especially had, well, made her uncomfortable. She said she couldn't bring herself to go to the funeral, and that Halliday understood, and would prefer that she shouldn't mope round all day and be unhappy. I thought it was rather plucky of her to try and forget things. I could see she was all cut up."

Gay drew a sudden breath.

"Nick, I don't wish to seem uncharitable, but Julie told me that she heard Mr. Halliday beg his wife to go with him."

"Well, she must have heard wrong then. Mrs. Halliday said distinctly that he didn't want her to. That's not our affair anyway; but—Did you speak, Gay?"

"No," said Gay quietly. "Go on."

"She got out a road map and I showed her the route, and warned her about those hills above Anton Bay. She said that she was a bit nervous about driving, and wished she could find someone for a chauffeur. I suggested Sam Hilton, but she thought they'd have a better time without a

stranger along; and then the idea popped into her head to ask me. She said she didn't see why it hadn't occurred to her in the first place."

Gay said, as he paused again: "Aren't you talking too long, dear?"

"No, Madam, I'm not." He smiled.

"I want to get it off my chest. I hesitated about accepting, of course, because my plans were all made to go to you; but as I looked at those maps, Gay, I—well, I was crazy to go! I don't mean that I didn't want you and the boys, too, but—"

"But you wanted the broad highway more?" Gay questioned as he hesitated. "I'll admit, Nick, that the broad highway, with a woman as pretty as Mrs. Halliday thrown in, would weigh rather heavily in the balance against a tired-out wife and—"

"Gay!"

His voice was reproachful, and she laughed, though the laugh was tremulous.

"I was only teasing you, Nick."

"The pretty woman had nothing whatever to do with it," he affirmed sternly. "I'm not adamant before those eyes, no fellow with any red blood in his veins would be; but I knew another pair of eyes—well—I've told you all about those hundreds of times. They're the most beautiful eyes in the world. Now are you satisfied? It was the road that called me, Gay. I suppose it always will. And I remembered your making me promise to tell you if ever I wanted more freedom. It didn't seem a lot to ask when you were coming Wednesday anyway. I don't believe, honestly, dear, I don't believe if I hadn't known you were coming so soon, that the road would have called at all, compared with the call of my precious family. But you were coming, and it seemed a chance to satisfy my craving for a change, and to do a kindness to a neighbor at the same time. So—I telephoned."

"I was terribly disappointed," Gay admitted.

"I knew you were. It made me feel like a slacker—while you were talking; and yet, I didn't think I was unreasonable."

"You weren't, of course. I'm just too silly about you, Nick."

He smiled and said: "Keep on that way, my dear."

"Have you forgotten your story?" she reminded him after a minute.

"I had, for the time being. When, after putting up with his shortcomings for four long years, a man's wife confesses that she's silly about him, it goes to his head. And I suppose all this time you're wondering about those guests of Mrs. Halliday's. The truth is, they disappointed her. I didn't see her again till Sunday. I was at the Maxwell's Saturday. Janey called up at noon—said she heard I wasn't going to State Line, and asked if I'd hike with her up Ragged Mountain, and go back to supper there. She was just home and wanted news of you and the kiddies. I had a bully time, and stayed till nearly eleven."

"But—how did you happen to go Mason's Falls if Mrs. Halliday's friends didn't come? I thought she was taking the trip on their account."

"She was, but she had everything ready, lunch and all, when the message came. I could see she was disappointed, and so was I. When she asked if it would bore me to go with her alone—and if you'd disapprove, well, I suppose I jumped at the chance. I thought we'd be back by five at the very latest, and I knew that you'd be the last one to object. It never occurred to me that Halliday would mind—I mean, mind her going alone with me; and it did seem foolish to give up the trip at that hour; so we went." His face sobered suddenly. "I wish to God we hadn't."

Gay sat still for a moment; then said: "Nick do you remember stopping at a railroad crossing while a freight went by?"

His eyes widened with surprise. "Why—how did you know? I remember because it was there we ran into a funeral, a rather lonely affair with only one shabby hack. For a

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

Well, boys and girls, so many queer things have happened to us while flying about the world during the last few months, that we just have to tell you the story of our adventures. Some day, perhaps you'll fly over strange countries, too; countries filled with savage tribes and wild animals, and a thousand interesting things one never dreams of while sitting at home.

Perhaps you'll fly above the clouds at times and look down on them billowing and rolling beneath the wings of your plane. Just like a big sea of gold and silver in the sun; and away down below you'll see great fleets of warships in their harbors, so far down that they look like toy boats floating on the rim of a bathtub.

At other times you'll fly over black tropical forests and follow the white track of unknown rivers under the light of a huge bright moon—wonderful, dangerous forests where crocodiles lurk in the swamps and tigers and bears hunt through the livelong night, while blue faced monkeys swing and jabber in the trees.

You'll see these things, and a thousand more, and of course you'll want to tell the boys and girls you know all about your adventures, just like I am going to tell you mine.

Most of the boys and girls I know call me Captain Jimmy. While my real name is Captain James Harworth Newberry, only the grown-ups call me that. We fly a Vickers' plane. By we, I mean Scottie and myself. Scottie is one of those plain whiskery dogs known as Scotch Terriers. He looks like an animated bath brush, and he has never won a blue ribbon or a prize; yet, for sheer personality, he's a dog show all by himself.

Scottie is the first mate and the crew—and what a crew he makes. Anyway, I found Scottie when he was only about six weeks old, and he and I just took to each other. You know how it is. Sometimes a dog just adopts you. You don't buy him; he picks you. Scottie just got used to riding around with me so I couldn't keep him out of the plane. From the day of my first ride he has gone everywhere with me—all over Canada, Europe and even Africa.

It was a fine bright morning when we pulled the old Vickers out of her hangar, at the Calgary flying field, and headed her out into the wind. Perhaps if we had known all the adventures we were going to meet we would never have made the trip at all. For you know, while it's lots of fun to read of adventures, actually having them sometimes is not all it's cracked up to be—and you

often—yes, very often—wish that you were in some nice safe place instead. We had the propeller humming like a giant bee—the even contented hum that is music to an airman—when the ground shot away from under us and we rose into the sky. We were probably going 70 or 80 miles an hour, but it didn't feel so fast as we got further away from the field.

Once in the air, a plane is not hard to drive. In front of the pilot's seat is the chief control lever known as the "stick." It is not a very hard name to remember, but it is a sure enough important piece of the plane. When I pull the stick toward me, it lifts the horizontal fins on the tail of the plane, and causes the nose to push up into the air. When I push the stick from me, it pulls the fins down, and of course pulls the plane down too. The foot levers work the rudders at the extreme tail of the plane. When I push the one to the right, the plane turns to the right—when I push to the left, the plane goes to the left. It's exactly like steering a car, only you do it with your feet instead. A round clock on the instrument board tells me how fast I am going—another tells me how high I am in the air. So you see it's all easy enough when you get used to it—like lots of things that look hard at first.

Calgary soon looked like a model city as it faded away behind us, and we roared out toward the foothills with the wind whistling in the struts, and the Eagle climbing higher and higher. We had a good high ceiling and no clouds in the sky. We could see the horizon on every side, like the rim of a giant saucer. What a country!

As we flew over the foothills, the scenery became more beautiful. Wooded slopes, cool ravines, and here and there an open valley where the lonely cabin of some homesteader or prospector showed half in the cover of the woods. Then shadows began to make patches on the sunlit country below—the shadows of gathering clouds. Scottie seemed to sense something wrong and pawed at my flying suit—as dogs do when trying to draw your attention. Then suddenly "puff!" a gust of wind struck us—then another and another. Then a rain squall hit us—and in a moment we were in the center of the meanest storm you ever saw, the old ship rocking and tossing like a boat in an angry sea—the sky growing darker every minute—and the rain coming down in sheets amid the blinding stab of blue lightning. Then the right wing dipped crazily and the plane began to slip sideways.

To be continued next week.
